

Ghulam Qadir

Aspiring Data Science & Machine Learning Intern

awaisaly0852@gmail.com | [LinkedIn](#) | [GitHub](#) | 03287617997 | Ghotki, Pakistan

Professional Summary

Motivated Computer Science student with a foundational understanding of Python, data analysis, and basic machine learning concepts. Eager to secure an internship role to apply academic knowledge to real-world datasets, assist senior data teams, and continuously learn industry best practices. Strong team player with a passion for problem-solving and exploring data-driven insights.

Technical Skills

Programming Languages: Python (Basic Proficiency), C++, SQL, Git

Data Handling & Visualization: Introductory knowledge of Pandas, NumPy, Matplotlib, and Seaborn

Machine Learning & AI: Familiarity with Scikit-Learn concepts (classification, regression)

Tools & Frameworks: Jupyter Notebook, Streamlit (Basic setup)

Education

The Islamia University of Bahawalpur (IUB)

Pakistan

BS Computer Science (Data Science & AI) — Currently in 7th Semester

- Honors: Dean's Honor List

Academic & Personal Projects

Basic HR Resume Parser (Academic Project)

Feb. 2025 – Present

Python, Pandas

- Assisted in developing a basic script to read and analyze sample resumes and job descriptions.
- Gained hands-on experience using simple text preprocessing techniques to identify matching keywords between candidates and job postings.

Exploratory Data Analysis: Dental Appointments

May 2026

Python, Matplotlib

- Conducted exploratory data analysis (EDA) on a sample dataset of historical appointments to practice identifying trends.
- Created basic visualizations using Seaborn and Matplotlib to present findings on patient attendance patterns.

Simple Automated Quiz App

Aug. 2025 – Sep. 2025

Streamlit, Python

- Built a beginner-level interactive web application using Streamlit.
- Utilized basic Python string manipulation and introductory natural language processing libraries to extract words from text passages and format them as multiple-choice questions.

Cafe Chatbot Prototype

Feb. 2026 – Mar. 2026

Python, Scikit-Learn

- Participated in creating a simple, rule-based text classifier to map basic customer queries (like menu requests) to automated responses.
- Learned the fundamentals of training a basic supervised learning model for text classification.

Academic Experience

Student Teaching Assistant - Computer Science Department

Apr. 2026 – Present

The Islamia University of Bahawalpur

- Assist peers and junior students during programming and basic machine learning lab sessions.
- Help troubleshoot beginner-level Python code and explain introductory data structures and algorithms.
- Support faculty with organizing lab materials and maintaining a collaborative learning environment.

Certifications & Achievements

- Dean's Honor List - IUB
- DataCamp Introduction to Machine Learning Certificate
- DataCamp Python Basics Certificate
